Presentation Topic

Systematic Analysis of Siphon Operations and Assessment, Veronica Alvarez – Red Zone

The presentation will be about different operations and maintenance approaches on various siphons and the economic impact it can create for the utility owner and contractors. The first approach that will be discussed will be centered around cleaning siphons that have not been maintained and where minimal information is available. Secondly, the methodology of inspection and the various means that can be attempted dependent on the technology used. Lastly the combined approach of both inspection and cleaning will be discussed and evaluated.
