Presentation Topic

“Horizontal Hammer Boring – An Alternate Solution for New Installations in Rock, Cobbles, and Mixed Ground”

Presenter: Richard Revolinsky (Geonex)

This presentation will provide attendees with in-depth knowledge of the principles of Horizontal Hammer boring, including an overview of critical components and a summary of the fundamental differences between it and other trenchless technologies. This will further the ability of designers, contractors, and asset owners to mitigate risks during installation in formidable ground conditions. Recent installations utilizing the Horizontal Hammer Boring method will be evaluated and discussed, including how the method has been successfully utilized to complete challenging projects.
