“West County Wastewater’s Progressive Design Build Treatment Plant Project”

Presenter: Guyton Durnin (HDR)

West County Wastewater’s (WCW) 60-year-old 12.5 MGD wastewater treatment plant being upgraded using a progressive design-build (PDB) contract. This project aims to reduce energy consumption and GHG emissions, improve operational safety and efficiency, and improve the quality of the biosolids produced. Consistent with the vision and strategic goals, this project will result in the development of sustainability upgrades that support WCW’s strategic initiatives to adopt infrastructure maintenance and modernization strategies that maximize performance, reduce risk, and ensure reliable service in collaboration with local, regional, and national partners to further the mission of WCW.
